

GUNDRATHI LOKESH

Software Engineer · Java Backend · Distributed Systems

Bengaluru, India | +91 93477 16674 | lokeshgundrathi@gmail.com | LinkedIn | GitHub | Portfolio | Trailblazer

PROFESSIONAL SUMMARY

Java Backend Engineer with 2+ years of production experience building event-driven microservices, ETL pipelines, and multi-tenant SaaS platforms. Deployed on a long-term client engagement with **HHS Tech Group** through InspironLabs (Nov 2024 – Feb 2026), delivering production-grade data systems for US clients. Proficient in Spring Boot, Apache Kafka, PostgreSQL, MongoDB, AWS (SES, SQS, Lambda, S3), Kubernetes, and Docker. Hands-on with CI/CD pipelines, Grafana/Kibana observability, and microservice architecture across distributed systems.

TECHNICAL SKILLS

Languages	Java, SQL
Backend	Spring Boot, Spring Security, Apache Kafka, Spring MVC, Spring Scheduler, WebClient
Frontend	HTML5, CSS, Familiar: Java Script, React JS
Databases	PostgreSQL, MongoDB, Oracle SQL · Familiar: Snowflake, ClickHouse
Cloud & DevOps	AWS (SES, SQS, Lambda, S3) · Kubernetes · Docker · Docker Swarm · GitHub Actions · Jenkins
Monitoring	Grafana, Kibana, Elasticsearch

PROFESSIONAL EXPERIENCE

Software Engineer — Java Backend

Oct 2024 – Present

InspironLabs · Bengaluru

Client Engagement: HHS Tech Group · Nov 2024 – Feb 2026

- **Led technical delivery activities** across 4 production microservices, participating in sprint planning, code reviews, release coordination, and production support.
- Engineered a fault-tolerant **Kafka consumer pipeline** processing **60–70 events/minute**; implemented offset-based retry logic with **AWS SES dead-letter alerts** — achieving zero silent data loss across 15+ months of production operation.
- Delivered a **scheduled ETL pipeline** orchestrating 6 Spring Boot microservices via Kafka to aggregate, transform, and stage provider datasets to **AWS S3** daily for downstream client consumption.
- Implemented async, non-blocking inter-service communication using **Spring WebClient** and applied **Gzip compression** on outbound payloads, reducing API transfer overhead under sustained production load.
- Built **multi-tenant authentication** with Spring Security, JWT, and cookie management; configured **DNS A/CNAME routing** for per-tenant isolation across shared production infrastructure.
- Developed a configurable **Reporting Engine** supporting **Runtime Database Switching** between **PostgreSQL**, **Snowflake**, and **ClickHouse**, enabling **Multi-Source Analytics** without redeployment.
- Automated **AWS Workspace Provisioning** through an **Event-Driven Architecture** using **Amazon SQS** and **AWS Lambda**, eliminating manual provisioning activities and reducing onboarding effort.
- Managed **Kubernetes Deployments**, **Docker Swarm Services**, and **AWS Lambda Workloads**, including **Horizontal Scaling**, **Environment Management**, and **Production Troubleshooting** using **Grafana** and **Kibana**.
- Maintained **CI/CD Pipelines** using **GitHub Actions** and **Jenkins**, ensuring reliable **Build**, **Deployment**, and **Release Automation** across multiple backend services.
- Applied **Strategy Pattern** and **Factory Pattern** to standardize business workflows, improve **Code Maintainability**, increase **Extensibility**, and reduce duplicated implementation logic.

KEY PROJECTS

Provider Data Extract

Spring Boot | Apache Kafka | PostgreSQL | AWS SES | Kubernetes | Grafana | Client: HHS Tech Group

- Built a real-time **Kafka Consumer Pipeline** processing **60–70 events/minute**, aggregating data across multiple **PostgreSQL** tables and transforming it into a target **JSON Schema** for external API delivery.
- Implemented **Offset-Based Retry Logic** with **Apache Kafka** and integrated **AWS SES Alerting**, ensuring **Zero Silent Data Loss** and full operational visibility.
- Improved downstream throughput using **Spring WebClient** for **Asynchronous Communication** and **Gzip Compression** for payload optimization.

Provider Data Export — ETL Pipeline

Spring Boot | Apache Kafka | AWS S3 | Kubernetes | Grafana | Client: HHS Tech Group

- Designed and developed a **Scheduled ETL Pipeline** orchestrating **6 Spring Boot Microservices** through **Apache Kafka** to aggregate, package, and deliver provider datasets to **Amazon S3**.
- Implemented **Fault-Tolerant Processing** using **Kafka Topic Replay** and monitored **Consumer Lag**, **Pipeline Latency**, and infrastructure health through **Grafana** and **Kubernetes**.

DYP — Discover Your Provider

Spring Boot | Spring Scheduler | Kubernetes | Kibana | Client: HHS Tech Group

- Developed **REST APIs** supporting provider discovery workflows and backend platform services.
- Implemented **Spring Scheduler** jobs for automated background processing and monitored production health through **Kibana** and **Kubernetes**.

Foresight AI — Multi-Tenant SaaS Platform

Spring Boot | Spring Security | JWT | AWS (SQS, Lambda, SES) | PostgreSQL | Snowflake | ClickHouse | Docker Swarm | GitHub Actions

- Implemented **Multi-Tenant Authentication & Authorization** using **Spring Security**, **JWT**, and **Cookie-Based Session Management**, enabling secure tenant isolation.
- Developed a **Runtime Database Switching Engine** supporting **PostgreSQL**, **Snowflake**, and **ClickHouse**, enabling **Multi-Source Analytics** without application redeployment.
- Automated **AWS Workspace Provisioning** through an **Event-Driven Architecture** using **Amazon SQS** and **AWS Lambda**, eliminating manual onboarding activities.
- Managed **Docker Swarm Deployments**, **GitHub Actions CI/CD Pipelines**, and production monitoring using **Kibana**.

EDUCATION

B.Tech – Computer Science & Engineering

Sri Venkateswara College of Engineering, Tirupati

2020 – 2024

CGPA: 8.37 / 10

CERTIFICATIONS

- **Full Stack Java Developer** · JSpiders · Feb – Oct 2024
- **Salesforce Developer** — Learner/Developer Track · [Trailhead](#) · Jul 2023 – Aug 2024
